

Öykü Tütüncü

Industrial Engineering Student

My name is Öykü Tütüncü, and I am a third-year industrial engineering student at Hacettepe University. I love working hard and am a highly motivated individual. I am an inquisitive individual with a keen openness to learning, continuously improving myself through this mindset. I am very good at problem solving and I have confidence in my analytical thinking and communication skills. Additionally, I am a social and amiable person who enjoys getting along with others and prone to group work. Since starting university, I have actively participated in various student communities and career events. I am very good at planning and consider myself a disciplined individual. Industrial engineering is the profession I've been looking for, and my enthusiasm and interest in this field are very high.
